Banking & KYC Knowledge Base

India-focused demo knowledge base for a local RAG banking assistant. Not an official bank/RBI/UIDAI document.

1. What this Banking Assistant Does

This educational chatbot can explain common banking services, help a customer prepare for a bank visit, provide general document checklists, and explain KYC/Re-KYC preparation. It cannot access a bank account, verify identity, submit KYC, approve a product, or perform transactions.

2. Common Banking Services

Savings and current accounts; debit-card replacement or blocking; cheque-book requests; account statements; contact-detail updates; address updates; KYC/Re-KYC preparation; general branch-visit preparation; and basic fraud-safety guidance.

3. KYC Basics

KYC means Know Your Customer. Banks use customer due-diligence procedures to establish identity, address/profile information and other required details under applicable rules. Requirements vary by customer type, product, risk category and bank.

4. Common KYC Document Categories

Common officially valid document categories under the RBI KYC framework include passport, driving licence, proof of possession of Aadhaar number, voter identity card, NREGA job card, and a letter issued by the National Population Register containing name and address, subject to applicable rules and bank acceptance. PAN or an equivalent tax identifier may also be relevant depending on the service and applicable requirements.

5. Periodic KYC / Re-KYC

RBI's KYC framework uses a risk-based approach. The commonly stated minimum periodicity is at least once every 2 years for high-risk customers, 8 years for medium-risk customers, and 10 years for low-risk customers, counted from account opening or the last KYC verification/updation, subject to later amendments and applicable instructions. RBI's 2025 amendment also added relief/process provisions for specified low-risk individual customers and authorised Business Correspondents.

6. KYC Update Checklist

Prepare your customer/account number if available; a current bank-accepted identity/address document; PAN or applicable tax identifier where required; recent photograph if the bank's process requires it; updated mobile/email/address details when changing them; self-attested copies only when requested; and originals for verification if the bank asks. Never give OTPs, PINs, CVV, passwords or UPI PINs to anyone.

7. Address or Contact Change

If your address changes, ask the bank for its current KYC/address-update process and prepare current accepted address proof. For mobile/email changes, use the bank's authenticated channel. A bank KYC update and an Aadhaar update are separate processes.

8. Aadhaar-Related Guidance

UIDAI provides official Aadhaar update services through its online and Aadhaar Seva Kendra channels. Address and other demographic/biometric update routes depend on the service and current UIDAI rules. Do not assume an Aadhaar update automatically completes a bank KYC update.

9. What the Chatbot Must Not Do

Never request OTPs, PINs, CVV, passwords or UPI PINs. Never claim to have completed KYC or accessed an account. Never invent bank fees, interest rates, eligibility, branch addresses or turnaround times. When bank-specific information is missing, tell the user to verify it through the bank's current official channel.

10. Example Questions

Users can ask: “What documents should I carry for KYC update?”, “My address changed, what should I prepare?”, “What is Re-KYC?”, “What should I take to the bank to open an account?”, “What should I do if I suspect a fraudulent transaction?”, or “Can you update my KYC?” The correct demo response to the last question is that the chatbot can guide preparation but cannot perform the update.
